

***Kelo-cote® - advanced formula scar therapy now available in Canada!***

May 10, 2010

Dear Valued Customer,

Advanced Bio-Technologies, Inc. (ABT) is pleased to announce that Kelo-cote® advanced formula scar therapy is now available in Canada.

Kelo-cote® is a transparent, self drying, silicone gel with patented, cross-link technology which has been shown to improve the appearance of scars and prevent abnormal or excessive scar formation. Kelo-cote® is intended for the management of old and new scars, including hypertrophic scars and keloids, resulting from general surgical procedures, trauma, wounds and burns.

Kelo-cote® is one of the most clinically-tested forms of silicone scar management products with over 1,800 patients enrolled in published clinical studies.<sup>1</sup>
